THE BIG COMPUTER HACKERS BOOK BUNDLE BY PHIL SMITH PDF

The Big Computer Hackers Book Bundle arms you with the practical knowledge and tools required to become a security and penetration testing professional.

Three Great Books at a Great Price

- Book 1: 25 Privacy Tools for the Digital Wild West
- Book 2: The Hackers Roadmap: Security & Penetration Testing
- Book 3: How to Disappear in the Digital Age: Security, Privacy & Technology

What's Included?

Included are three great eBooks on three topics that should be at the forefront of every computer security professionals mind, we start off by looking at 25 fantastic tools and looking at some of the principles behind them. We then move on to book two where we really learn how to hack computers focusing on software and networks. We'll utilise the latest Linux, Windows and Mac security tools while at the same time building a virtual environment to ensure we can safely test out the attacks.

Finally we finish up on book three by considering the question - would it be possible do disappear in the digital age? - we do this by thinking about privacy tools and privacy issues and learn about the kinds of information being collected about us.

What will I know after book 1?

You will have looked at 25 security tools and be aware of how they work and importantly be more knowledgeable about the fundamental technologies that support them and the problems that they aim to solve. We cover 25 tools over 8 separate areas:

- Physical security
- Online security
- Account security
- Digital payments
- Privacy enhancing software
- Operating system security
- Advanced home network fortification
- Mobile security

What will I know after book 2?

You will have covered a wide range of practical security and penetration testing topics, gained practical experience by hacking Windows computers, used the latest security tools and be aware of technologies within the area. We cover the following topics:

- Setting up a virtual lab.

- Exploring the Linux operating system.
- Performing an offline attack.
- Bypassing the Windows security interface.
- Creating a multi-boot USB device.
- The Windows command line.
- Using Ophcrack.
- Full disk encryption.
- The Tor network and the deep/dark web.
- Web security and technologies.
- Capturing network traffic with Wireshark.
- Manipulating network traffic with Nmap.
- Network protocol theory.
- Using the Kali Linux hackers OS.
- Using Aircrack-ng to perform wireless attacks.
- Using the burp suite proxy to intercept web traffic.
- Using hydra to force login credentials.
- Using John the Ripper to brute force passwords.
- Using Mettego to perform social engineering.
- Using the Metasploit framework to perform attacks.
- Using the OWASP-Zap proxy to perform web attacks.
- Using SQLmap to perform SQL injection.
- Using TCP dump to capture network traffic on the command line.

What will I know after book 3?

We walk through a 4-step process of how to disappear in the digital age. Concerned with our physical and online lives we will look at how to strengthen our defences and make a clean break from society.

We cover many concepts such as the feasibility of disappearing, how to use privacy enhancing technologies and attempt to explain them in a way that everyone can understand.

We cover a wide range of topics such as the surveillance state, the legality of surveillance, how you're being tracked today, encryption, Tor, picking a new location, anti-septic computing and much more.
