Other Buddhist books offer you a path to happiness, Geshe Michael Roach offers a path to wealth. Roach, who while being a monk helped build a \$100 million business, demonstrates how ancient notions in **The Diamond Cutter** sutra can help you succeed, and if you're in business that means to make money, a lot of it. Drawing on lessons he learned in the diamond business and years in Buddhist monasteries, Roach shows how taking care of others is the ultimate path to taking care of oneself, even--especially--in business. As he puts it, you have to engage in "mental gardening," which means doing certain practical things that will form new habits that will create an ideal reality for you. If this sounds a little outrageous, his very precise instructions are down to earth and address numerous specific issues common to the business/management world. Through this practice, you will become a considerate, generous, introspective, creative person of immense integrity, and that will be the key to your wealth. At first this book comes off like a gimmick and the writing isn't without rough patches, but page by page, as Roach introduces you to the practical details and real-life examples, his arguments become more convincing. A cross between the Dalai Lama's ethics and Stephen Covey's *Seven Habits*, **The Diamond Cutter** will have you gardening a path to the bank. --Brian Bruya

## From Publishers Weekly

In the vein of Richard D. Phillips's *The Heart of an Executive: Lessons on Leadership from the Life of King David*, this book offers a practical application of Buddhist teachings to managing business and life. A Buddhist monk and former diamond district executive, Roach says that the three Buddhist-inspired principles on which he built his success can be applied to other businesses and other circumstances. The principles stipulate that businesses should be profitable, that we should enjoy the money we earn, not working ourselves so hard earning it that we can't enjoy the nice home or relaxing trip it might provide, and that we should be able to claim, when all is said and done, that our years in business were meaningful. "To summarize," writes Roach, "the goal of business, and of ancient Tibetan wisdom... is to enrich ourselves."

Roach's uncritical tendency to marry Buddhism and capitalism without so much as a raised eyebrow might give readers pause. (In the end, Roach redeems himself a little by suggesting that the Buddhist teachings of Limitlessness imply that everyone could have enough wealth.) The principles he propounds are appealing, indeed, but they tell us much more about current-day attitudes toward work and money than they do about "ancient Tibetan wisdom." Entrepreneurs seeking solid advice for worldly success may find this book helpful, but those interested in Tibetan Buddhism will likely consider it superficial. (Feb.)

With a unique combination of ancient and contemporary wisdom from the Tibetan Buddhist tradition, The Diamond Cutter presents readers with empowering strategies for success in their work and personal lives.

Geshe Michael Roach, one of the great teachers today of Tibetan Buddhism, has richly woven The Diamond Cutter in three layers. The first is a translation of selections from the Diamond Sutra itself, an ancient text comprised of conversations between the Buddha and his close disciple Subhuti. Considered a central work by Buddhists throughout the world, the Diamond Sutra has been the focus of much interpretation over the centuries. In the second layer, Geshe Michael quotes from some of the best commentaries of the Tibetan tradition. In the main text, the third layer, he uses both sutra and commentary as a jumping-off point for presenting his own teaching.

Geshe Michael gives fresh insight into ancient wisdom by using examples from his own experience as one of the founders of the Andin International Diamond Corporation, which was started with capital of fifty thousand dollars and which today has annual sales in excess of one hundred million dollars. Much of the success of Andin has come from applying the business strategies presented in The Diamond Cutter. Geshe Michael's easy style and spiritual understanding make this work of timeless wisdom an invaluable source for those already familiar with, and those unfamiliar with, Tibetan Buddhism.

Heartedly recommended

By Krasen Tomov

The *Diamond Cutter* book is very practical and a very special book. I read it a month ago and I can't say now that all of the principals do really work but my gut tells me that it is all true. One of the main ideas in the book is to take 2 or more weeks in solitude and to tackle the biggest challenges in your work and life, away from all the noise in the city and people - just to spend some time alone and listen to your mind. I usually do the most difficult things to feel the main idea, so I took 2 weeks away from work and went it in the mountains all by myself.

Believe it or not, I found answers to all of my challenges in work and in life. It was a very very scary thing and a really painful one; to see the bare naked truth of why I am the way I am and why I can't achieve what I like and desire. The truth was one and simple though. Nevertheless, it was really difficult to listen to my mind becoming louder and louder every day.

Ever since I'm back, I feel my life has been changed even though I am still the same. One small change in me that I can give as an example is that I don't write reviews on Amazon or anywhere else because it takes a lot of time and effort, and why would I bother to do it? Nothing I could gain - that's how I was thinking before. I just read what others have written and then I decide to purchase something here on Amazon or not. After reading *The Diamond Cutter* and *Karmic Management*, as you can see, I write reviews because there is something in me that believes now that what goes around comes around. Get the book and do something with it; reading is just reading - nice but take some action, then the change will come inevitably.

Amazing book!!

By Udana Power

A friend recommended a book entitled "How Yoga Works" by Geshe Michael Roach. Once I started reading it, I could not put it down. I was so impressed and intrigued by his ideas that I told another friend about it, and she said she had read his book "The Diamond Cutter" and loved it.

As soon as she left my house I downloaded a sample of it onto my Kindle and started reading. Breathless with excitement I then downloaded the whole book and just kept reading all night. I couldn't put it down. My mind was literally blowing ... Almost like flashbulbs going off in my brain. I saw that my financial success can be a direct reflection of my spiritual life. Money by itself does not motivate me, however, I've been broke and I've been rich...and rich is a lot more fun. It also gives me time to meditate and create as well as contribute more to the world.

Get this book! Read it. Then read it again. And start implementing some of the practices. They feel great. Business and commerce is finally making soul sense.

A very important book

By lavasong

This is the best explanation and illustration of karma that I have ever read. Geshe Michael Roach explains, from his experience and understanding of Buddhist wisdom and the teachings of other great teachers, exactly how the effects of our thoughts, actions and words extend into the world and create the conditions we experience.

The real world examples in this book illustrate that the strict moral integrity that is encouraged by all the world's greatest spiritual teachers is important not in the interest of social order or because of obedience, but because it creates the very fabric of our perceived reality. This book is a treasure.
