Great reference book

By tsugah

I bought this book new back in the 70s for a wildlife class that I was taking. I have often referred to it for methods of live animal control. It has plans for building your own live animal traps. I have just opened it again to help me with a Forest Management Plan for our property. I really like how it's written in a logical format. lot's of great ideas on how to. I would recommend this book to others.

Picked this up in college for free from professor back in the 1980's. As a property manager I still blow the dust off of it periodically to review it after 25+ years.
